Middle Fullstack

SUMMARY

As a passionate Full Stack Web Developer with over 3 years of experience, I specialize in building modern, scalable, and high-performance web applications using the MERN stack, Next.js, and NestJS. I have strong expertise in TypeScript, React, Next.js, NestJS, Node.js, Express, MongoDB, Redis, Redux Toolkit, Tailwind CSS, and MUI. I have successfully developed and delivered various complex projects including e-commerce platforms, admin panels, CRM systems, and analytical dashboards. My technical strengths include creating responsive and pixel-perfect user interfaces, building robust RESTful and GraphQL APIs, implementing efficient state management, optimizing application performance, and ensuring excellent user experience. I am highly skilled at turning complex requirements into clean, maintainable, and production-ready code while working effectively in team environments and consistently meeting project deadlines.

EDUCATION

Unitec School <i>No Degree in Web Full Stack</i>	Tashkent, Uzbekistan 2021
PDP <i>No Degree in Frontend Programming</i>	Tashkent, Uzbekistan 2020
Tashkent Technical School of Information Technology <i>High School Diploma</i>	Tashkent, Uzbekistan 2020

EXPERIENCE

UFT <i>Frontend Developer</i>	Tashkent, Uzbekistan 11/2025 – 03/2026
- Led frontend development of ERP modules using React, Next.js, TypeScript, and Redux Toolkit; delivered scalable CRUD features and stabilized existing functionality through systematic bug resolution. - Improved performance and user experience by optimizing API interactions (debouncing, error handling) and resolving UI freezes in data-heavy workflows, including bulk operations (20–30+ records). - Architected and integrated real-time features using Socket.IO alongside REST APIs (including authentication), ensuring reliable data synchronization and responsive system behavior. - Standardized frontend architecture by introducing reusable components and robust form handling/validation patterns; improved navigation flow and resolved critical UX issues across the application.	
Drensys <i>Frontend Developer</i>	Tashkent, Uzbekistan 03/2022 – 10/2025
- Developed complex, modular, and high-performance web applications using React and Next.js, writing stable and clean architecture code with JavaScript/TypeScript. - Efficiently implemented state management using Redux Toolkit, creating well-structured, layer-based, and maintainable project architecture. - Worked on core features for an online-school platform: student dashboards, lesson flow, payment sections, and profile management. - Developed frontend functionality for mass email and SMS notification systems - including status tracking, message-sending logic, and UI/UX flows.	
Setapp <i>Frontend Developer</i>	Tashkent, Uzbekistan 10/2021 – 03/2022
- Developed practical skills working with React and React-Redux, and later fully adopted Redux Toolkit for state management. - Participated in the development of a restaurant-focused POS (Point of Sale) system. - Worked with API integrations: connected frontend with endpoints handling products and user data.	

PROJECTS

Menoo	<i>Next.js, Typescript, Node.js, Express.js, Shadcn/ui</i>
Developed a fullstack POS (Point of Sale) system for restaurants, handling end-to-end architecture including frontend, backend, realtime communication, and database design. The system supports multiple roles (superadmin, admin, chef, waiter, cashier) and enables real-time order management, analytics, and staff operations. Successfully delivered an MVP to production with scalable and responsive system behavior.	
- Built the entire system architecture independently, covering frontend (React/Next.js), backend (Node.js/Express), real-time communication (Socket.IO), and database design. - Implemented real-time order management system using WebSockets, ensuring instant synchronization between roles (waiter, chef, cashier) and improving operational efficiency. - Designed and developed role-based access system (superadmin, admin, chef, waiter, cashier) with tailored dashboards, analytics, and workflow management.	

- Solved complex real-time consistency challenges by ensuring reliable socket communication across multiple roles and states.

TECHNICAL SKILLS

Programming Languages: Javascript, Typescript
Frameworks & Libraries: React, Next.js, Redux Toolkit, Node.js, NestJS, Express
Tools & Databases: Git, REST API, Socket.IO, MongoDB, Redis
